3 Composition and information of the ingredients of the hazardous chemical

• Chemical characterisation: S • CAS No. Designation:	CAS: 9016-87-9 Diphenylmethane diisocyanate, isomers and homologues
 Identification number(s): Index number: 	615-005-01-6

4 First-aid measures • Description of first aid measures • General information Remove, decontaminate and dispose of soiled, soaked clothing and shoes immediately. • After inhalation Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention. • After skin contact In case of contact with skin, preferably wash with polyethylene glycol-based cleaner or clean with plenty of warm water and soap. Consult a doctor in case of skin reactions.

	•
	(Contd. of page 2)
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
· After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medical attention required.
 Information for doctor Most important symptoms and effects, both acute and 	
delayed	Information for the doctor: The product irritates the respiratory tract and is a potential trigger for skin and respiratory sensitisation. Treatment of acute irritation or bronchial constriction is primarily symptomatic. Depending on the extent of exposure and the symptoms, prolonged medical treatment may be necessary.
 Indication of any immediate 	
medical attention and special	
treatment needed	No information available.
E Eine finkting messennes	
5 Fire-fighting measures	
· Extinguishing media	
	Use fire fighting measures that suit the environment.
· Special hazards arising from	5 5
the substance or mixture	Can be released in case of fire
	Carbon monoxide (CO)
	Nitrogen oxides (NOx)
	Hydrogen cyanide (HCN)
	Under certain fire conditions, traces of other toxic gases cannot be excluded.
• Advice for firefighters	
Advice for menginers	
· Protective equipment:	Put on breathing apparatus.
	Put on breathing apparatus.

6 Accidental release measures

 Personal precautions, protective equipment and 	
emergency procedures	Keep people at a distance and stay on the windward side. Put on breathing apparatus.
 Environmental precautions: Methods and material for 	Prevent material from reaching sewage system, holes and cellars.
containment and cleaning up	Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
· Reference to other sections	Dispose of contaminated material as waste according to item 13. Ensure adequate ventilation. See Section 7 for information on safe handling
Reference to other sections	See Section 7 for information on personal protection equipment. (Contd. on page 4)

	(Contd. of page 3
	See Section 13 for information on disposal.
Handling and storage	
Handling	
	 Ensure sufficient air exchange and/or extraction in the work areas Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eye and inhalation of vapours. Keep away from food and beverages. Wash hands before break and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately.
Conditions for safe storage,	
including any incompatibilities	Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet.
Storage	
Requirements to be met by storerooms and containers:	Store only in the original container.
storage conditions:	None.
Storage class	10
 Specific end use(s) 	No further relevant information available.

8 Exposure controls and personal protection

- Additional information about design of technical systems: No further data; see section 7.
 Control parameters
- Components with critical values that require monitoring at the workplace: Not required.

PNEC 1 mg/kg dwt (Bod)	
Additional information:	The lists that were valid during the compilation were used as basis
Exposure controls Personal protective equipr General protective and hygienic measures	nent Keep away from food, drink and animal feed.
	Remove soiled, soaked clothing immediately.
	Wash hands before breaks and at the end of work.
Breathing equipment:	Avoid contact with eyes and skin. Respiratory protection required at insufficiently ventilate
breating equipment.	workplaces and when working with splashes. Fresh air masks combination filters A2-P2 (EN529) are recommended for sho term work.
	If applicable, further recommendations for respiratory protection can be found in the appendix.
Protection of hands:	In case of hypersensitivity of the respiratory tract (asthma, chron bronchitis), handling of the product is not recommended. Suitable materials for protective gloves; EN 374:
	Butyl rubber, nitrile rubber, chloroprene rubber (neoprene).
	Note: suitable materials that provide sufficient protection f industrial cleaning with aprotic polar solvents (according to IUPA definition): butyl rubber.
	In case of prolonged or frequently repeated contact, a glove with protection class of 5 or higher is recommended (breakthrough tin greater than 240 minutes according to EN374). For short-ter contact, a glove with a protection class of 3 or higher recommended (breakthrough time greater than 60 minute according to EN374).
	The thickness of the material is not the only criterion for the level protection of a glove against a chemical substance. The protective effect also depends to a large extent on the type of glove materia
	Depending on the type and material, the thickness must be mo than 0.35 mm to ensure adequate protection in the event
	prolonged and frequent contact. Exceptions to this rule are mul layer gloves, which guarantee sufficient protection even with thickness of less than 0.35 mm during prolonged wear. Other glov materials with a thickness of less than 0.35 mm only provid
	sufficient protection for short periods of wear. For solvent-free products:

	Example:
	Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min. Fluoro rubber - FKM: thickness ≥0.4mm; breakthrough time
	≥480min.
Motorial of gloves	Recommendation: Dispose of contaminated gloves.
• Material of gloves	Polychloroprene - CR Nitrile rubber - NBR
	Butyl rubber - IIR
	Fluoro rubber - FKM
· Penetration time of glove	
material	Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min.
	Fluoro rubber - FKM: Thickness ≥0.4mm; Breakthrough time ≥480min.
• Eye protection: • Body protection:	Safety goggles with side protection in accordance with EN 166. Use chemical-resistant protective clothing.
	In case of hypersensitivity of the skin, handling the product is not recommended.
