3 Composition and information of the ingredients of the hazardous chemical

| 4 First-aid measures | |
|------------------------------|---|
| · Index number: | 615-005-01-6 |
| · CAS No. Designation: | CAS: 9016-87-9 Diphenylmethane diisocyanate, isomers and homologues |
| · Chemical characterisation: | Substances |

| Description of first aid me | |
|-----------------------------|--|
| General information | Remove, decontaminate and dispose of soiled, soaked clothing |
| | and shoes immediately. |
| | |
| After inhalation | Remove person to fresh air, keep warm, allow to rest; if breathing |
| | is difficult, seek medical attention. |
| | |
| After skin contact | In case of contact with skin, preferably wash with polyethylen |
| | |
| | glycol-based cleaner or clean with plenty of warm water and soap |
| | Consult a doctor in case of skin reactions. |
| | Consult a doctor in case of skin reactions. |

| | (Contd. of page See Section 13 for information on disposal. |
|--|---|
| | , |
| Handling and storage | |
| Handling | |
| Precautions for safe handling | Ensure sufficient air exchange and/or extraction in the work area Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours ca occur in higher concentrations, targeted air extraction must k used to prevent the occupational hygiene limit value from beir exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must k observed. The protective measures required when handlin isocyanates must be observed. Avoid contact with skin and eye and inhalation of vapours. Keep away from food and beverages. Wash hands before breat and at the end of work and apply skin protection ointment. Sto work clothes separately. Remove soiled, soaked clothir immediately. |
| Conditions for safe storage, including any incompatibilities | Keep container dry and tightly closed. Further information on th |
| - | storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet. |
| Storage | |
| Requirements to be met by | Others and in the evisional container |
| storerooms and containers: Further information about | Store only in the original container. |
| storage conditions: | None. |
| Storage class | 10 |
| Specific end use(s) | No further relevant information available. |

8 Exposure controls and personal protection

- Additional information about design of technical systems: No further data; see section 7.
 Control parameters
- Components with critical values that require monitoring at the workplace: Not required.

| PNECs | |
| CAS: 9016-87-9 Diphenylm | ethane diisocyanate, isomers and homologues |
| PNEC 1 mg/l (Sewage Treat | tment Plant) |
| 0.1 mg/l (Mew) | |
| 1 mg/l (Freshwater) | |
| PNEC 1 mg/kg dwt (Bod) | |
| Additional information: | The lists that were valid during the compilation were used as basis |
| Exposure controls Personal protective equipn General protective and hygienic measures | Keep away from food, drink and animal feed. |
| | Remove soiled, soaked clothing immediately. |
| | Wash hands before breaks and at the end of work. Avoid contact with eyes and skin. |
| Breathing equipment: | Respiratory protection required at insufficiently ventilate |
| Dicuting equipment. | workplaces and when working with splashes. Fresh air masks combination filters A2-P2 (EN529) are recommended for shot term work. If applicable, further recommendations for respiratory protection can be found in the appendix. In case of hypersensitivity of the respiratory tract (asthma, chrored) |
| Protection of hands: | bronchitis), handling of the product is not recommended. Suitable materials for protective gloves; EN 374: Butyl rubber, nitrile rubber, chloroprene rubber (neoprene). Note: suitable materials that provide sufficient protection f industrial cleaning with aprotic polar solvents (according to IUPA |
| | definition): butyl rubber. |
| | In case of prolonged or frequently repeated contact, a glove with protection class of 5 or higher is recommended (breakthrough tin greater than 240 minutes according to EN374). For short-ter contact, a glove with a protection class of 3 or higher recommended (breakthrough time greater than 60 minute according to EN374). |
| | The thickness of the material is not the only criterion for the level protection of a glove against a chemical substance. The protective effect also depends to a large extent on the type of glove materia Depending on the type and material, the thickness must be mo than 0.35 mm to ensure adequate protection in the event prolonged and frequent contact. Exceptions to this rule are mul layer gloves, which guarantee sufficient protection even with thickness of less than 0.35 mm during prolonged wear. Other glove materials with a thickness of less than 0.35 mm only provide |
| | sufficient protection for short periods of wear. For solvent-free products: |
