	D 222 - D	(Contd. of page 1)
	P333+P.	313 If skin irritation or rash occurs: Get medical advice/
		attention.
	P363	Wash contaminated clothing before reuse.
	P501	Dispose of contents/container in accordance with local/regional/national/international regulations.
Other hazards		

- Other hazards
 Results of PBT and vPvB assessment
- · PBT:

Not applicable.

· vPvB:

Not applicable.

3 Composition and information of the ingredients of the hazardous chemical

- · Chemical characterisation: Mixtures
- **Description:** Mixture consisting of the following components.

[.] Dangerous comp	ponents:	
CAS: 1317-65-3	Calcium carbonate	30-60%
CAS: 36443-68-2	Ethylenebis(oxyethylene) bis[3-(5-tert-butyl-4-hydroxy-m-tolyl) propionate] Aquatic Chronic 1, H410	<i>≥</i> 0.025-<0.25%
	Reaction mass of Decanedioic acid, bis(1,2,2,6,6-pentamethyl- 4-piperidinyl) ester and decanedioic acid,(1,2,2,6,6- pentamethyl-4-piperidinyl) methyl ester	<i>≥</i> 0.1-<0.25%
	Repr. 2, H361; Aquatic Acute 1, H400; Aquatic Chronic 1, H410; Skin Sens. 1, H317	
· Additional inform	nation For the wording of the listed hazard phrases refer	to section 16.

4 First-aid measures

Description of first aid meas	ures
General information	Remove, decontaminate and dispose of soiled, soaked clothing and shoes immediately.
· After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
· After skin contact	In case of contact with skin, preferably wash with polyethylene glycol-based cleaner or clean with plenty of warm water and soap. Consult a doctor in case of skin reactions.
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
· After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medical attention required.
 Information for doctor Most important symptoms and effects, both acute and 	
delayed	Information for the doctor: The product irritates the respiratory tract and is a potential trigger for skin and respiratory sensitisation. Treatment of acute irritation or bronchial constriction is primarily

(Contd. of page 2) symptomatic. Depending on the extent of exposure and the symptoms, prolonged medical treatment may be necessary.

 Indication of any immediate medical attention and special treatment needed

No information available.

5 Fire-fighting measures

- Extinguishing media
- · Suitable extinguishing agents Use fire fighting measures that suit the environment.
- Special hazards arising from
 - the substance or mixture No further relevant information available.
- Advice for firefighters • Protective equipment:
- No special measures required.

6 Accidental release measures

 Personal precautions, protective equipment and 	
emergency procedures	Not required.
• Environmental precautions:	No special measures required.
Methods and material for	
containment and cleaning up	: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
Reference to other sections	No dangerous materials are released.
	See Section 7 for information on safe handling
	See Section 8 for information on personal protection equipment.
	See Section 13 for information on disposal.

7 Handling and storage

· Handling

• **Precautions for safe handling** Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application.

For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eyes and inhalation of vapours. Keep away from food and beverages. Wash hands before breaks and at the end of work and apply skin protection ointment. Store (Contd. on page 4)

	(Contd. of pag work clothes separately. Remove soiled, soaked cloth immediately.
Conditions for safe storage, including any	
incompatibilities	Keep container dry and tightly closed. Further information on storage conditions that must be observed for quality assurar reasons can be found in our technical data sheet.
Storage	
Requirements to be met by	
storerooms and containers:	Store only in the original container.
Further information about	
storage conditions:	None.
Storage class	10
Specific end use(s)	No further relevant information available.

8 Exposure controls and personal protection

 Additional information about design of technical systems: No further data; see section 7.

Control parameters

• Components with critical values that require monitoring at the workplace:

CAS: 1317-65-3 Calcium carbonate

PEL (Malaysia) Long-term value: 10 mg/m³

·DNELs

CAS: 1317-65-3 Calcium carbonate

Oral DNEL 6.1 mg/kg bw/Tag (ArL)

Inhalative DNEL 10 mg/m³ (ArL)

· PNECs

CAS: 1317-65-3 Calcium carbonate

PNEC 100 mg/l (Sewage Treatment Plant)

• Additional information: The lists that were valid during the compilation were used as basis.

Keep away from food, drink and animal feed.

· Exposure controls

· Personal protective equipment

- · General protective and
- hygienic measures
 - Remove soiled, soaked clothing immediately. Wash hands before breaks and at the end of work.
- · Breathing equipment:
- Avoid contact with eyes and skin. Respiratory protection required at insufficiently ventilated workplaces and when working with splashes. Fresh air masks or combination filters A2-P2 (EN529) are recommended for shortterm work.

If applicable, further recommendations for respiratory protection can be found in the appendix.

In case of hypersensitivity of the respiratory tract (asthma, chronic (Contd. on page 5)

de name ombran flex - Kon	nponeme A
	(Contd. of page
	bronchitis), handling of the product is not recommended.
· Protection of hands:	Suitable materials for protective gloves; EN 374:
	Butyl rubber, nitrile rubber, chloroprene rubber (neoprene).
	Note: suitable materials that provide sufficient protection
	industrial cleaning with aprotic polar solvents (according to IUF
	definition): butyl rubber.
	In case of prolonged or frequently repeated contact, a glove with
	protection class of 5 or higher is recommended (breakthrough t
	greater than 240 minutes according to EN374). For short-te
	contact, a glove with a protection class of 3 or higher
	recommended (breakthrough time greater than 60 minu
	according to EN374).
	The thickness of the material is not the only criterion for the leve
	protection of a glove against a chemical substance. The protec
	effect also depends to a large extent on the type of glove mate
	Depending on the type and material, the thickness must be m
	than 0.35 mm to ensure adequate protection in the even
	prolonged and frequent contact. Exceptions to this rule are m
	layer gloves, which guarantee sufficient protection even wit
	thickness of less than 0.35 mm during prolonged wear. Other gl
	materials with a thickness of less than 0.35 mm only prov
	sufficient protection for short periods of wear.
	For solvent-free products:
	Example:
	Polychloroprene - CR: thickness ≥0.5mm; breakthrough t
	≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough t
	≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480m
	Fluoro rubber - FKM: thickness ≥0.4mm; breakthrough th
	≥480min.
Matarial of alarras	Recommendation: Dispose of contaminated gloves.
Material of gloves	Polychloroprene - CR
	Nitrile rubber - NBR
	Butyl rubber - IIR Elucro rubber - EKM
Ponotration time of alove	Fluoro rubber - FKM
Penetration time of glove material	Polychloroprene - CR: thickness ≥0.5mm; breakthrough t
materiai	≥480min.
	Nitrile rubber - NBR: thickness ≥ 0.35 mm; breakthrough the transformation of the second se
	≥480min.
	<i>≥</i> 400/mm. Butyl rubber - IIR: thickness <i>≥</i> 0.5mm; breakthrough time <i>≥</i> 480m
	Fluoro rubber - FKM: Thickness ≥0.4mm; Breakthrough time ≥400m
	≥480min.
Eye protection:	Safety goggles with side protection in accordance with EN 166.
Body protection:	Use chemical-resistant protective clothing.
Body protection.	In case of hypersensitivity of the skin, handling the product is
	IN LASE OF TWOEISETSTIVITY OF THE SKIT TRADITION THE MINATURE

Information on basic physical and chei	mical properties
General Information Appearance:	
Form:	Pasty
Colour:	Whitish
Smell:	Characteristic
Odour threshold:	Not determined.
pH-value:	Not determined.
Change in condition	
Melting point/freezing point	Not determined
Initial boiling point and boiling range	Not determined
Flash point:	>220 °C
Flammability	Not applicable.
Auto-ignition temperature	420 °C
Decomposition temperature:	Not determined.
Ignition temperature:	Product is not selfigniting.
Explosive properties:	Product is not explosive.
Critical values for explosion:	
Lower:	<0.1 Vol %
Upper:	0.2 Vol %
Steam pressure at 219 °C:	2.6 hPa
Density at 20 °C	2.23 g/cm ³
Relative density	Not determined.
Vapour density	Not determined.
Evaporation rate	Not determined.
Solubility in / Miscibility with	
Water:	Not miscible or difficult to mix
Partition coefficient: n-octanol/water	Not determined.
Viscosity:	
dynamic:	Not determined.
kinematic:	Not determined.
